Liquid Polyester Filter Bag manufacture by COX Filter Cloth who is a leading manufacturer of Filter Bag, Filter Fabric, Filter Cloth in China.

Liquid polyester filter bag provide depth filtration and have a high solids retention capacity. All of our PET filter bag have their outside surface singed or glazed to prevent fabric fibers from the bag getting into the clean, filtered process media. Liquid polyester filter bags can be used in the filtering of a wide array of industrial and commercial process fluids for separating solid from liquid in the fields of mining, metallurgy, coal, effluent treatment and so on.

PES filter bag ideal filter media to sperate liquid from solid and ideal material to purity and filter gas.

1 Micron polyester filter bag can filter normal air temperature or high-temperature gas,including gas mixed with acid and alkali,oil ,water.

2 Storage of polyester liquid filter bag should not be long-term exposure in the sunlight,and Stored in dry well ventilated place.
