

## Liquid PP Filter Bag

**Liquid PP Filter Bag manufacture by COX Filter Cloth who is a leading manufacturer of Filter Bag, Filter Fabric, Filter Cloth in China.**

**Liquid PP filter bag** made by quality micron polypropylene filter fabric which through felt, quality inspection cutting, welding or seaming process. Polypropylene filter bags provide depth

filtration and have a high solids retention capacity, it can trap contaminants in different depths to accomplish the filtration requirements.

**Polypropylene Filter Bags** have wide range in liquid filter industry. PP filter bags are made by the best available raw material in industry. Liquid PP filter bag widely used for water/liquid filtration in sewage treatment plants, chemical plants, pharmaceutical plants, food industry etc.

COX Filter Cloth make singed or glazed process of surface PP filter fabric to keep the liquid filter bag easy to clean.

Both metal(carbon steel and stainless steel) and plastic sealing rings are available for our **PP Filter Bags**. It must select right filter bag neck material according the liquid type of filter

Filtration rate from 0.5 to 200 micron of pp material liquid filter bag.

- 1) Material: vorigin micron felt **polypropylene filter fabric**(0.5, 1, 5, 10, 25, 50, 100, 150, 200)
- 2) Continous working temperature: 90 , Instant 110
- 3) **PP filter bag** have excellent air permeability. High-efficiency filtration media for water and liquid filtration.
- 4) **Polypropylene Filter Bag** widely used in food industry, sewage treatment plants, pharmaceutical plants ,etc.
- 5) Filtration efficiency : more than 99%
